

Renovations

Â Dymott Builders have extensive experience in the renovation of all types of existing buildings, including those that are Grade I or Grade II Listed, are made from traditional or unusual materials and those sited in Conservation Areas where special provisions have to be met.

We pride ourselves in ensuring that all renovations are both sympathetic to the original structure whilst employing - where appropriate - the most modern techniques.

Whether you have in mind a barn conversion, adding a conservatory or simply fitting a new kitchen, Dymott Builders will ensure that the project is completed with skill, attention to every detail and with your budget very much in mind.
